

# Where on Earth are we going?

## And what can we do about it?

These are two of the questions that are at the heart of The **Change the Dream** Symposium.

The Symposium is a profound inquiry into how we might realise a bold vision: an environmentally sustainable, spiritually fulfilling, and socially just human presence on Earth.

If you are ready to explore what this vision means for you, and for the opportunity to create an inspiring future, we invite you to attend.

*"I thought I already knew a lot about all this, but the Symposium really blew me away. I went for some networking, and came away also better informed, inspired, enthused and equipped to share that enthusiasm."*

# Change The Dream

The Change The Dream Symposium takes a fresh look at our most critical current concerns – **environmental sustainability, social justice and spiritual fulfilment** – and explores and exposes what connects them.

A unique, one-day experience, it offers insight into the nature of our world, with:

- **Leading-edge information**
- **Dynamic group interaction**
- **Inspiring video clips from some of the world's most respected thinkers and doers, including Paul Hawken, Desmond Tutu, Julia Butterfly Hill, Brian Swimme and Thomas Berry**

The aim of the Symposium is to explore how, by pulling together on an unprecedented scale, we can move in a new direction, towards an era of interconnected action and collective wellbeing.

Indigenous people of South America who still live in their traditional Earth-honouring ways, refer to our modern worldview as our 'dream'. They have urged us, for the sake of all life, to 'change the dream of the North'. Changing this 'dream' of ours will be a 'do-it-yourself-together' project, accomplished by committed individuals working in concert – tens of millions of us, each willing to think and act in a whole new way.

The Symposium brings together the people of any community – a village or a town, a school or a business – around a real commitment to make a difference. It does not present a slate of policies, but rather opens up, in a unique way, the opportunity for conscious evolution through our collective choices, partnerships and actions.

**If you are ready to be disturbed, inspired and moved to action, and ready to be introduced to a thriving community of like-hearted, deeply committed people, we invite you to come to this Symposium.**
